RMD Ages

Some options depend on whether the IRA owner died before or on/after their required beginning date (RBD). The RBD is generally April 1 following the year the IRA owner reached their required minimum distribution (RMD) age which is:

- Age 75 (if born in 1960 or later)
- Age 73 (if born 1951-1959)
- Age 72 (if born July 1, 1949 – December 31, 1950)
- Age 70½ (if born before July 1, 1949)

1. The duration an Inherited IRA can remain open depends on several factors, including the QT type (accumulation or conduit), the primary beneficiary, and the number of primary beneficiaries. It's essential for the trustee to consult with an attorney to understand the specific trust distribution options available.
2. In some instances an entity may be able to disclaim.
3. RMDs are based on the IRA owner's age as of their birthday in the year of death. The divisor is reduced by one in each subsequent year.
